Capital Dynamics Implements eFront FrontInvest

Paris, March 6, 2013 – eFront, a leading software provider of financial solutions for managing alternative investments, is pleased to announce Capital Dynamics, a global private asset management firm headquartered in Switzerland, as a new client. Capital Dynamics will implement eFront’s flagship fund management and reporting software product, FrontInvest.

Capital Dynamics’ commitment to high-quality client service prompted its decision to bring an innovative technology solution to its sophisticated client base. With this new software, Capital Dynamics aims to enhance the overall client experience through customizable solutions – and tailored, bespoke services.

FrontInvest’s fully integrated solution and dynamic dashboards will allow Capital Dynamics to further automate and standardize processes and controls, thus improving the speed of its service to clients. FrontInvest will also allow Capital Dynamics to further enhance its monitoring and reporting capabilities across all levels of data, thus ensuring clients receive the most comprehensive financial, performance, and exposure reports available.

Capital Dynamics chose FrontInvest after a thorough search and selection process beginning with a formal RFP, followed by months of in-depth due diligence and rigorous testing. The result of those efforts is the eFront solution, which Capital Dynamics believes is best-suited to meet its increasingly complex fund management and reporting requirements, quality expectations and client service needs.

“We believe eFront is the most progressive software provider with recognized expertise in alternative investments currently in the market,” explained **George Georgiou, Managing Director and Chief Operating Officer at Capital Dynamics**. “We feel that FrontInvest is the most advanced and integrated platform available today, and the one that will allow us to continue providing first-class service to our clients well into the future.”

“Capital Dynamics is not just buying a fund management and reporting system,” commented **Olivier Dellenbach, founder and CEO at eFront**. “They are entering into a partnership with a technology provider who shares the same vision in terms of promoting a more automated, standardized and transparent flow of information within the alternative assets industry.”

About Capital Dynamics

Capital Dynamics is an independent, global asset manager, investing in private equity and clean energy infrastructure. It is client-focused, tailoring solutions to meet investor requirements. It manages investments through a broad range of products and opportunities including separate account solutions, investment funds and structured private equity products. Capital Dynamics currently has USD 17 billion in assets under management. Its investment history dates back to 1988. Its senior investment professionals average over 20 years of investing experience across the private equity spectrum. It believes its experience and culture of innovation give it superior insight and help it to deliver returns for clients. Capital Dynamics invests locally while operating globally from London, New York, Zug, Tokyo, Hong Kong, Silicon Valley, Sao Paulo, Munich, Birmingham (UK) and Brisbane offices.

Capital Dynamics comprises Capital Dynamics Holding AG and its affiliates; assets under management include assets under discretionary management as well as advisory assets of all Capital Dynamics affiliates. Investments are primarily on behalf of funds managed by Capital Dynamics. www.capdyn.com
